Education

Phnom Penh International University

Bachelor of Computer Science
2021-2025

Bak Tuk High School
High school bachelor
2019-2020

Skills

- HTML,CSS,Javascript
- Bootstrap,Tailwind css,shadcn
- Redux,zustand
- Reactjs,Nextjs,Express,Django
- Git , Gitlab, Github
- Sql Server,Postgresql
- Prima,Drizzle ORM
- Figma

Personal Info

- Gender : male
- Date of birth : 17th November 2002
- Nationality : Cambodian
- Place of birth : Svay Domnak village, Chumnik commune, Krochmar district, Tbong Khmom province.
- Address : Trea village, Stueng Meanchey Commune, Phnom Penh
- Marital Status : Single

Experience

Internship Front end developer 16/11/2024 -

KiloIT

During my internship in React.js as a frontend developer, I gained extensive experience in building interactive and dynamic user interfaces. I developed a strong foundation in creating reusable components, managing state efficiently with hooks, and optimizing performance through techniques like memoization and lazy loading

Projects

E-Commerce UI Design

- Built a modern single application with responsive design using React and Tailwind CSS
- Implemented category filtering and reusable components

Dashboard Interface

- Created a clean, data-driven dashboard using Next.js ,Prisma and PostgreSQL
- Designed responsive UI with Shadcn and custom layouts

University Library System

- Full-stack CRUD system with authentication
- Used Next.js, PostgreSQL, Drizzle, and Tailwind for both frontend and backend

Dear Sir/Madam

I am writing to express my interest in the Full-Stack Developer position. As a final-year Computer Science student at Phnom Penh International University, I have a strong passion for web development and hands-on experience in building full-stack applications using Next.js, React, PostgreSQL, and Tailwind CSS.

Throughout my studies, I have worked on several meaningful projects that demonstrate both my technical skills and creativity:

-  E-commerce Platform UI: I developed a clean and responsive e-commerce user interface by using Reactjs, Swiper.js, Frammer motion, and Tailwind CSS. The platform includes a wishlist feature, product carousel, and category filtering for a smooth shopping experience.
-  Admin Dashboard System: I built an interactive dashboard with Nextjs,Tailwind CSS, Shadcn, Prisma, Zustand and Postgres. featuring user management, analytics, and real-time UI updates. This helped me strengthen my skills in component design and state management.
-  University Library System: I created a digital library platform for managing books, categories, and user borrowing history. The system includes authentication, search/filter functionality, and CRUD operations using Nextjs, Shadcn, PostgreSQL, and Drizzle ORM

These projects reflect my ability to design, develop, and optimize user interfaces and backend services that are scalable, responsive, and user-friendly. I'm eager to contribute to a collaborative development team where I can grow and apply my skills to real-world solutions.

Thank you for considering my application. I look forward to the opportunity to contribute and grow as part of your development team.

Best regards,

Ong Chansy
